4/3D DIVA

Stereoplay review, 09/1998

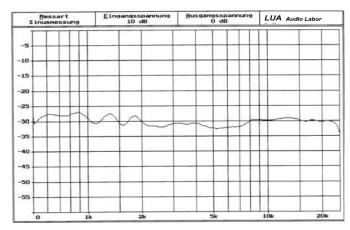

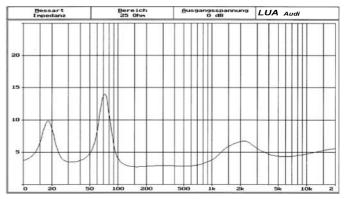

Frequency-response Bass: Computer- Simulation

Description:

The 4/3D is a allround talent, you can hear every day and with every type of music. With good electronic you can power this speaker to high levels, but notice, - with good electronic! The development of our 4/3D is a big step in the construction of cabinets. Cabinets tend to create their own resonances. So these enclosures have been designed to damp down unwanted coloration. The complicated manufacturing of the cabinet takes much experiences and knowledge from the craftsmen. Also the chassis have been revised and our high recommended tweeter now runs 2.000 Hz- 25kHz, which is outstanding for an 25mm fabric dome tweeter. Also the other data you will not find a lot of in market as there is the sensitivity of 90dB/1W/1Metre and the perfect dry and deep bass down to 62Hz (-3dB) out of net volume only of 46,7 litres! It's a women- like loudspeaker with it's nice design and the lot of veneers and colours. With the 4/3D you will require a loudspeaker which will reproduce all the dynamics and subtilities of the most complex classical, jazz and pop music scores. For this reason choose the 4/3D!

Frequency- response ± 1,5 dB: Mid- high range

Loudspeaker: Impedance curve

Technical Data:

Principle: 3- way Bassreflex, optimised damping *Recommended installation:* stereo base distance between 2- 3 Metres, 5-10° angled to innerside, optimised up to 0,3- 1Metre from side walls and 0,30 - 1Metre from rear wall, to save the excellent deepness- staggering of the speaker.

Quantity and type of chassis:

2 woofers: 195 mm, cone

1 midrange system: 37 mm, low mass polpropylene

1 tweeter: 25 mm, low mass fabric dome

Cross- over network: Filter 2.Order/ Butterworth

Split-frequencies: 1.100 Hz / 2.500 Hz.

Cross- volume: 46,7 Litres Tuning-Frequency: 34,5 Hz

Frequency range: 38 - 25.000 Hz DIN 45 500 Frequency response: (-3 dB) 62 Hz - 25.000 Hz Power handling nominal/ music: 60 Watt (IEC 268-5)

Peak power handling: 120 Watt Sensitivity: 90 dB/1Watt/1Metre

Recommended power amplifier handling: up to 150 W/Sin. by

linear tone control and ½ rms./ power

Nominal impedance: 4 ohms (amplifiers with 2/4/8 Ohms sta-

bility are optimised)

Dimensions: (W x H x D) 216 x 865 x 250 mm

Net- weight: 16,6 kg

Warranty: 2 years for first owner

Available veneers: black, silver, elder, cherry

All alterations are reserved at every time and without any notice and information for change of the actual data of this brochure.
